RECEIVED

MAR 18 2002

TNT Industrial Contractors, Inc.

Subject: Pine Flat Turbine Bypass

Dear Randy and Scott:

On behalf of the Kings River Conservation District, I would like to take this opportunity to extend our congratulations to your firm and your subcontractors, Syblon Reid, Penhall, and Morris Electric on a job well done. Your "on-time" completion of the Phase I civil work allowed the District to begin power generation at the Pine Flat Power Plant on February 28, 2002.

The civil construction work required excavation, demolition, heavy concrete and electrical installation in a small and congested area adjacent to our 230 kV switchyard. You and your subcontractors' ability and willingness to do what was necessary to meet the March 1st generation date was greatly appreciated. We recognize the work was complicated and required a great deal of coordination among all the parties involved.

TNT's Chuck Flannigan, Bob Flora, and Joel Caris; Syblon Reid's Lee Slupianek and Paul Barlow; Penhall's Bryan McGeo, and Morris Electric's Chris Bezeck should all be commended for their efforts and contributions. They performed as an efficient team and were very respectful of the District's staff and facilities.

We look forward to working with you on completing the second phase of the Project this fall when the power plant ceases generation for the season.

Sincerely,

James T. Richards, P.E.
Chief, Hydro Division
