TNT Industrial Contractors, Inc. **Commitment to Developing our business**

We are committed to being the leaders in our industry. We will continue to find innovative ways to meet the needs of our customers and advance our position in the industry. We will seek out new ideas and techniques to ensure we are a quality company.

Commitment to our customers

We are committed to providing quality performance and dependable service to our customers. We will complete our contracts on time or ahead of schedule, ensuring quality workmanship in all areas. We will treat our customers with the highest respect and be responsive to their needs.

Commitment to our employees

We are committed to employing the best personnel available. Our employees are respected for their honesty, integrity, experience, and knowledge. They are given the appropriate responsibility and accountability to get the job done. They will be recognized for their contribution to the company's success.

Commitment to our suppliers

We are committed to our suppliers and subcontractors. We are committed to their success as well as ours. We depend on them to deliver quality products and services to our customers.

Commitment to safety

We are committed to safety. We insist that our employees and suppliers follow our policy of "Safety First" when completing a contract. No contract is complete unless it is safe.

Commitment to Value and Profit

We are committed to value and profit. It is critical for every business to make a profit to survive and grow. We will manage our business in a way that allows us to make every job profitable. However, we will not sacrifice quality or performance for profitability. Our customers, employees and suppliers will receive full value from the relationship with us.

Industrial Plumbing

Our plumbing and piping professionals have a great depth of technical know-how. They have been designing and installing mechanical systems in many types of buildings and industrial facilities for over 40 years.

One of our specialties is sanitary stainless steel piping for food, high technology, pharmaceutical, and nutritional processing facilities. Included among our piping installations are utility, process, instrumentation equipment, heating, and control and monitoring systems.

Heavy Civil Construction

Hheavy-civil-construction projects for public and private clients are the focus of our Northern California Division. This Preeminent constructive force is capable of taking on any size project in the West, no matter the size, complexity or difficulty of location.

The projects performed as general contractor, in joint venture with other contractors, and the group has extensive capabilities and experience in design/build work.

General Construction

Our General Construction capabilities can fulfill your building and site work needs, from renovation, underground to new construction. We employ our own craftspeople that come from all trades of general construction and have years of experience in their crafts. Theirs is a strong work ethic backed by a proud record of performance.

At the core of construction is a group of seasoned managers. They have direct responsibility for quality of work and adherence to schedules and budgets. Accelerated construction for early completion dates is a specialty of these managers. Together with experienced field supervision, they guide your project through every phase to see that it successfully meets performance objectives.

Client Comments

TNT comments from our clients:
Kings River Conservation District,
"Congratulations to your firm and your subcontractors on a job well done".
"Your "On-Time" Completion of Phase I Civil Work allowed the District to begin power generation at Pine Flat Power Plant".
James Richards
PE Chief Hydro Division
Kings River Conservation District
